Fall 2015

WORK EXPERIENCE

Oracle

2018-Present

Cloud Customer Success Manager - Burlington, MA

- Involved with programming projects

- Reverse Engineering - Programmed in backend part of project using **Python** to generate **Terraform** scripts, which recreated a cloud environment from an existing environment's information

- Thousand Monkeys - Programmed in backend part of a web application using **Kubernetes**, Oracle's serverless **Functions**, and **Docker** to simulate enterprise workloads hitting Oracle's Autonomous Transaction Processing Database
- Video Game Project - Worked in a team to develop three games in **Unity** using **C#** showcased in a monthly hub meeting
- Assisted around 30-40 customers at a time throughout their lifecycles
 - Learned about and researched cloud technologies and customer use cases to assist in answering questions during implementation
 - Worked with account teams including Sales Reps and Sales Consultants
 - Onboarded new customers who were technologically unfamiliar with the cloud
 - Advocated internally and escalated for customers running into issues
 - Encouraged expansions into new use cases and renewals when contracts were expiring
 - Engaged customers in reference program
 - Led migrations for customers off of Gen 1 Oracle Cloud Infrastructure
- Leadership Opportunities
 - True Colors personality test for team building exercise
 - Coordinate Solution Engineer specialist trainings for Networking and Docker/Kubernetes

Malayan Banking Berhad

Summer 2017 and 2018

Compliance Department – New York, NY

- Assisted in developing and improving an anti-money laundering risk assessment in Excel using **VBA**
- Conducted extensive research to obtain customers' beneficial owners, per FinCEN regulation
- Improved upon an existing presentation for subsequent delivery to the Board of Directors
- Compiled compliance department documents and tracked branch documents provided for upcoming internal audit examination
- Updated country risk ratings for further inclusion into local Compliance system and critical documents based on Head Office's requirements
- Assisted in updating the Compliance Program for reporting to Head Office
- Organized compliance regulations in Excel for further information gathering and reporting
- Assisted Compliance team with various other tasks (i.e. updating Customer Profile Risk Assessments, creating an introductory presentation for future interns, organizing files, etc.)
- Learned about proprietary systems used to check for OFAC sanctions

PRO Unlimited

Summer 2016

Goldman Sachs Asset Management Tax Department – Jersey City, NJ

- Provided written and verbal responses to notices from state taxing authorities for hundreds of Goldman Sachs Asset Management entities
- Attended various required compliance training courses in the Financial Services industry

LEADERSHIP EXPERIENCE

- Chinese Culture Society – Secretary

ACTIVITIES

- Video Game Development Club (Design Team)
- Business Analytics Society
- MIS Society
- The National Society of Collegiate Scholars
- Villanova Day of Service, Volunteer
